Definitions:

Post-consumer: Material that has been used as a consumer item and then diverted from municipal solid waste for the purpose of collection and recycling. The term excludes material generated in manufacturing and converting processes such as manufacturing scrap and trimmings/cuttings. Also, print overruns, over-issue publications, and obsolete inventories that did not leave the generating facility would be classified as pre-consumer materials and should **not** be reported on this form.

****Gross Weight:** Enter the Gross Weight of all material. Do not subtract processing residue before entering your tonnages on this form. Processing residue is material that is collected and weighed with recyclables, but is disposed rather than recycled. PA DEP has a formula it will use to subtract processing residue.

Residential tonnage: Residential tonnage includes recyclables from households, condominiums, apartment complexes and townhouses.

**COMPLETE ONE REPORT FOR
EACH COUNTY WHERE YOU
COLLECTED RECYCLABLES IN
THE PRIOR YEAR.
SUBMIT REPORT TO COUNTY NO
LATER THAN FEB 1st!**

Your accurate and timely reporting enables the County and the State to determine an accurate recycling rate and showcase the importance and viability of the recycling industry.
