

To whom it may concern:

After living in this community since I was 10 years old, I realize that I want to be more involved. I see this community in a time of rebirth, with various small businesses opening and seeing people attend events, like Tarentum Nights. I have worked with various community boards/committees in the past, just not here in my hometown. This is where I will be spending the rest of my life and I want to see it thrive so that many other generations get to enjoy it as well. It is time to get my feet wet and assist where needed.

I look forward to the opportunity to serve on this board. I know my past experiences will be an asset to the team. When I commit to helping, I am present.

Thank you.

Wendy Conn
