RE: Delpac Tank

Project No. 2025-19875

Dear Mr. Adams,

MEI is pleased to provide the following proposal for cleaning, transportation and disposal of the tank bottoms of your Delpac storage tanks.

MEI will provide a 2-man crew, vacuum truck, and all PPE to handle Delpac sediment. The sediment will be neutralized with a soda ash slurry provided by MEI and flushed with water as necessary. The waste will be transported to MEI's bio-solid treatment facility for proper disposal based on the previously approved profile.

Pricing for this service will be as follows:

| | |
|---|------------------------------|
| Rate Cleaning Crew and Equipment (4hrs onsite) | \$ 1,985.00 / day |
| Hourly rate after 4 hours on site | \$ 325.00 / hour |
| Disposal | \$ 150.00 / ton |
| Vacuum truck washout | \$ 0.50 / gallon used |

We have based our proposal on the following assumptions:

- **MEI will perform job scope as an open shop environmental contractor.**
- **No confined space entry is included in this proposal.**
- **MEI will need to neutralize the waste before putting into our tank truck.**
- **MEI will need access to a water source on site.**
- **All other work performed outside of this job scope will be invoiced at MEI's General rate schedule.**

Waste Acceptance/Treatability: The pricing and acceptability of this material will be based upon disposal facility review and approval of the analysis and waste profile with the signed generator acknowledgement and evaluation of a representative sample for treatability. All pricing quoted will be confirmed through the waste acceptance/treatability processes prior to approval or shipment.

Taxes, fees and or surcharges: Taxes, fees and or surcharges for transportation or waste disposal assessed by any Federal, State, City or County agency due to the nature, classification or use of the material being transported or disposed, will be the responsibility of the customer and show as a separate line item on all invoices.

Demurrage: The customer is responsible for all delays (beyond agreed free time) caused by the loading or unloading facility.

"Protecting our environment for tomorrow's generations."

Decontamination: Any equipment requiring a washout of the hauling body will be done after notification of the vendor. These charges will be billed back to the customer.

Rejected Loads: The customer will incur additional transportation charges for any loads that are turned away at the unloading facility because it fails to conform to the accepted waste profile.

Scheduling, No Load or Cancellations: Proper cancellation of services is required, 24 hours in advance of the scheduled service time. When equipment is not properly cancelled, the customer will be invoiced at the quoted rate. If a service is requested less than 24 hours of the required service time, the invoice will reflect a 25% increase in the quoted price.

Fines: If material is improperly labeled, weighed, packaged, or manifested the customer is responsible for payment of all fines.

Fuel Surcharges: Fuel surcharges are included in your quote.

Proprietary Right: This proposal is made as a proprietary response to your request. Any use of this proposal or parts thereof to develop client work plans or solicit other responses or any release to third parties of the information contained herein is strictly prohibited without the prior written approval of MEI.

This proposal is valid for a period of thirty days. By ordering this work to be completed you are accepting the terms and conditions as stated herein. All pricing is offered assuming equipment availability at the time of order placement.

We wish to thank you for an opportunity to submit this proposal. MEI will need to receive this signed proposal acknowledging the pricing prior to commencing any work. Payment terms are "Net 30-Days" with finance charges of 1.5% per month on past due balances.

We look forward to working with you on this project. If you have any questions or require additional information, please contact me at 724-568-3623 ext. 132.

Sincerely,

McCUTCHEON ENTERPRISES, INC.
